

Appendix E—Area and Master Plans List

The following is a list of area and master plans currently in use by city and county departments. Master plans are used to implement a city’s or county’s general and comprehensive plans. The intent is that they be consistent with the goals and policies provided in the general and comprehensive plans. Some provided the framework for the development of the *Regional Land Use and Transportation Plan*, while others are the tools for the delivery and funding of services, facilities and programs. Following the adoption of the *Regional Land Use and Transportation Plan*, it is expected that many of these plans will be revised as appropriate in conformance with the policies and strategies of the Regional Plan.
